

SMARTCUBE 60 THERMOELECTRIC SC60T MODEL SPECIFICATIONS (Automated)

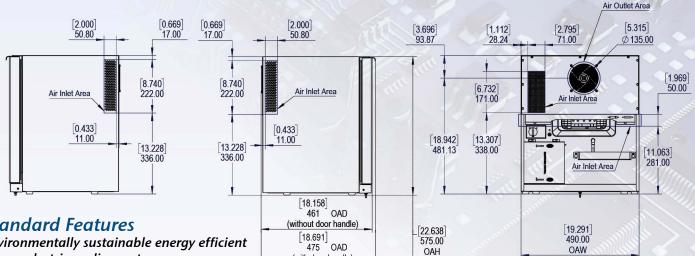

SMART CUBE®

SmartCube SC60T Model Specification

(with door handle)

1. Standard Features

- Environmentally sustainable energy efficient thermoelectric cooling system
- Console Box (control module) can be serviced easily and located remotely
- Shelves use infrared sensors (no moving or mechanical parts) .
- Plug-and-play cold cube shelving and door racks (no cables)
- NEW robust electronic lock with mechanical override feature
- Removable product dividers for easy cleaning
- Cyclopentane thermal foaming insulation (reduces ozone depletion)
- **Reversible door hinging**
- Magnetically sealed doors
- Internal LED lighting
- Automatic defrost
- Self-diagnostic reporting software
- Customized front panel to integrate with design[†]
- Case good cabinet door sliders available
- ADA compliant

2. Technical Specifications

11/12/18	SC60T Thermoelectric
Part Number	SC60T
Cooling Type	Peltier Thermoelectric Superconductor 5 Heat Pipe
Capacity (liters / cubic feet)	50 / 1.766
Dimensions HxWxD (inches)* HxWxD (mm)*	22.92 x 19.29 x 18.7* 582.4 x 490 x 475*
Door Option	Full Glass Front: No Window, Full Window, Partial Window, Stainless Full Window Solid Laminated: Black Solid, Stainless Steel
Watts (W)	42-52W
Voltage (V)	110V / 60Hz or 220V / 50Hz
Amps	0.35-0.75
Energy Consumption (kWh/24h)**	0.32 kWh/24h**
Net Weight (lbs / kgs)	52.91lbs / 24kgs
Noise Level (dB)	40 dB
Certification	CSA/CE/FCC/ETL/WEEE/RoHS ISO 9001 and ISO 14001 certified

Solid Laminated Door Options

* Measured to door handle

**Average energy consumption per 24 hours, at 25°C (77°F) ambient temperature and 7°C (44.6°F) cooling temperature, in compliance with EN ISO 7371 † Recommended weight of panel is no more than 9 lbs. (4.08Kg). Recommended thickness, ¾ inches (18-20mm) Specifications may change without notice due to continuous product development.

SMART CUBE®

SmartCube SC60T Model Specification

3. SmartCube Sensor Shelf Configuration

SmartCube has interior sensor shelves for both the cold cube and the door. There are three possible shelf configurations for both the cold cube and the door. Please note that a sensor shelf is required in the top locations of the door and cold cube.

3.1 Door and Cold Cube Sensor Shelves

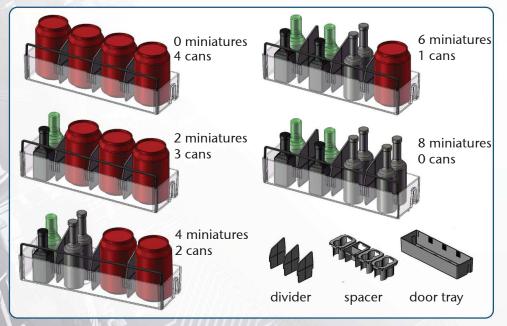

Conformal coated and sealed to keep out moisture

door rack shelf

cold cube shelf

3.2 Customizable Door Racking Configurations

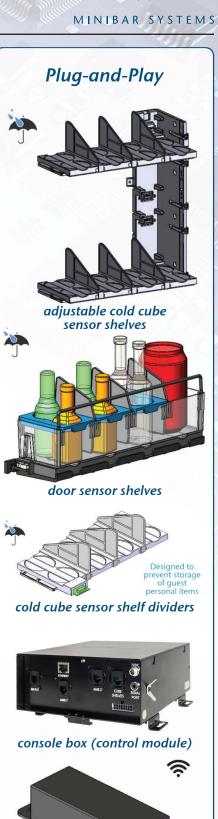

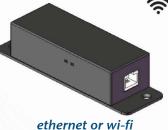

3.3 Shelf Dividers Prevent Guest Personal Use

- Designed to prevent storage of guests personal items
- Improved product placement and display

Page | 3

4. Plug-and-Play - No cable connection

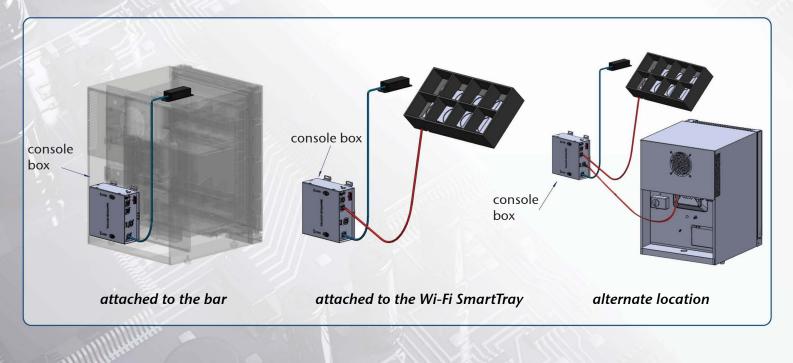

5. Console Box (Control Module)

- Console Box contains all Printed Circuit Board Assemblies (PCBA's): mainboard, lock, bluetooth, & communication
- Flexible mounting options for ease of maintenance
- Wi-Fi module has an extension cable to achieve maximum signal connectivity
- Console Box easily replaced without troubleshooting individual PCBA's

5.1 Console Box Mounting Locations

Console Box can be mounted on the SmartCube, on the SmartTray or alternate location

SMART CUBE® SmartCube SC60T Model Specification

6. Ventilation – Basic Principles

Ventilation occurs by convection, which is the tendency of hot air to rise and colder air to sink. See recommendations in 6.1 through 6.4 on how to achieve proper ventilation.

Note: Proper ventilation and installation are required in order to not void SmartCube warranty.

6.1 Front Air Intake Ventilation (Toe Kick)

The inlet vent(s) must have a minimum open area of $43.9in^2$ (28.31m²) to comply with specifications. This is based on a typical guest room environment of 77° F (25° C) with a relative humidity of no more than 65%. The inlet vent can be provided in any of the following configurations:

- *i.* A cut-out in the toe kick
- ii. A series of slots in the toe kick
- iii. A grill in the toe kick
- iv. An arched opening in the toe kick

Note: For optimal ventilation a door should not be installed in front of SmartCube.

6.2 Case Good Base Ventilation (Bottom Cut-Out)

The cabinet bottom is to be cut away directly behind and below the cooling unit. The shelf cut-out must have a minimum open area of 73.81in² (47.62m²). The easiest way to accomplish the required ventilation is to cut away across the complete width and extend the cut out back to the rear of the case good.

6.3 Case Good Side Ventilation (Side Vent)

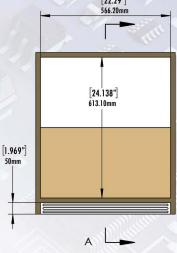

Side inlets should be cut to a minimum open area of 54.25in²(35m²). It is recommended to have two side inlets but at a minimum of one inlet would be acceptable alternative.

6.4 Exhaust Ventilation (Grill or Back Vent)

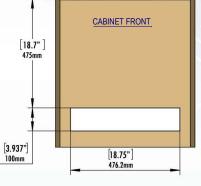

- 1. Back Exhaust ventilation (see Fig 6.1) Cut out in the back allowing trapped heat to escape.
- 2. Top Exhaust Ventilation (see Fig 6.4) Grill/Vent cut out on top for trapped heat to escape

Note: Ventilation from back requires a minimum 1.5in (38mm) air gap behind the case good for exhaust flow.

6.4 Exhaust Ventilation Continued

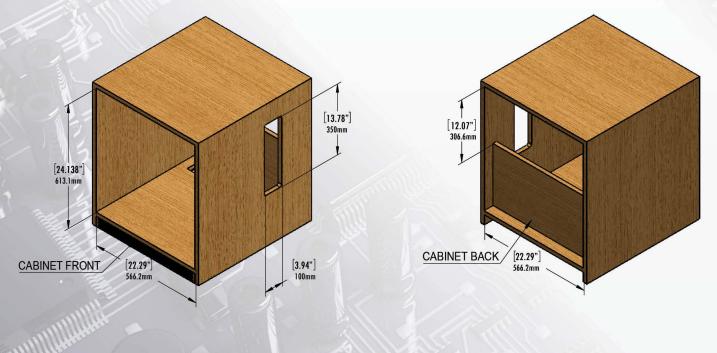

SMART CUBE®

SmartCube SC60T Model Specification

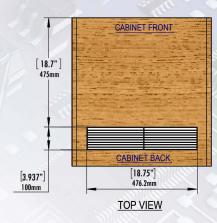

Exhaust ventilation is required in the case good to prevent warm air from being trapped in the top section causing the SmartCube to overheat. The exhaust vent(s) must have a minimum open area of 269in² (173.57m²) to comply with specifications (see Fig. 6.1). The exhaust vent(s) can be provided in any of the following configurations:

- A series of slots or a grill in the top i.
- ii. A series of slots or a grill in the back at the top
- iii. If the design will not permit the use of slots or a grill, the unit should be spaced 1.5" (38.1mm) from the wall to allow proper exhaust. Use spacers or stoppers to prevent the case good from being pushed up against the wall. In this configuration, the back of the case good must be cut away see Fig 6.1. The underside of the shelf above the SmartCube must be flat so that there are no obstruction to the airflow.

The exhaust vent must exit into free space in the quest room. It must not vent into an enclosed space such as a closet, case good or ceiling void, as the heat will be trapped. The SmartCube must not be placed up against a heating radiator, window curtains or in direct sunlight. Ventilation grills or slots must not be covered. Please contact your Minibar Systems representative for review and certification of your case good design and drawings to ensure your design meets the SmartCube and SmartCube Case Good Specifications. If these ventilation requirements are not met, the warranty is void. The case good documents can be found on the SmartCube.MinibarSystems.com website or from your Minibar Systems representative.

Top View Fig 6.4 (Optional Ventilation)

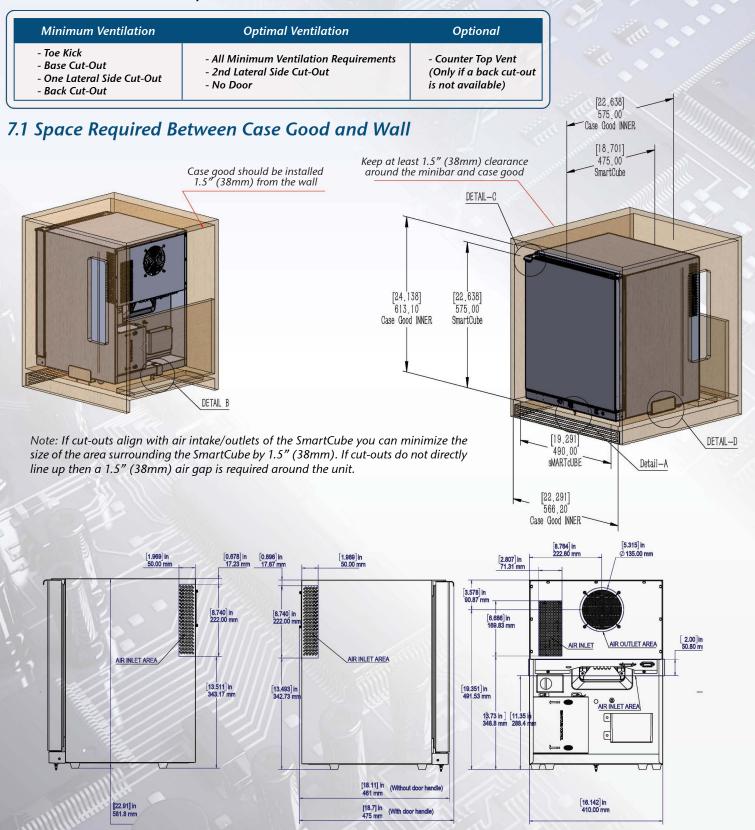

7. Ventilation and Cavity Requirements

Lateral cut-outs should line up with air intakes and air outlets.

8. Installing Anti-Tilt Bracket and Securing to Case Good

SmartCube should be secured to case good using supplied hardware: 2 side brackets, anti-tilt bracket, and front mounting screw

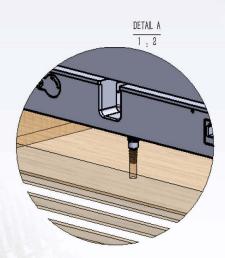

SmartCube SC60T Model Specification

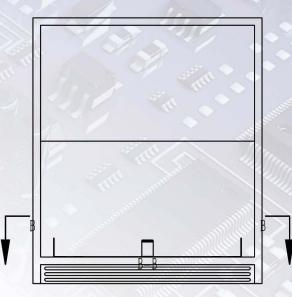

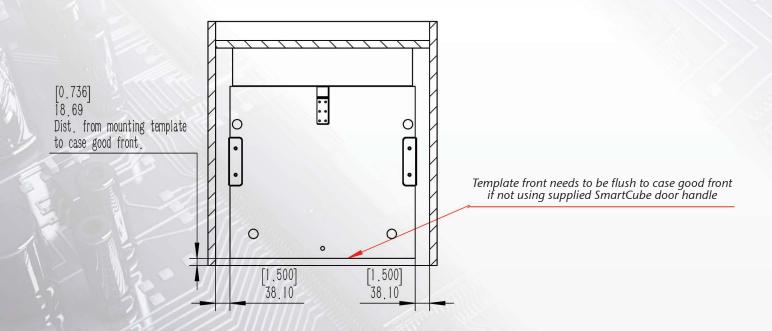

8.3 Installing & Anchoring SmartCube

SmartCube should be secured to case good from front using supplied hardware: front mounting screw

9. Guest Network Configuration

Server Minimum Requirements	
Туре	Physical or Virtual
Processor	Dual Core 3GHz or faster (x86 or x64)
Memory	32GB Dedicated RAM
Operating System	Windows Server 2019 R2 (64 bits), 2022
Disk Space	500 GB minimum with redundancy (1TB recommended)
SmartCube Connection	10/100/1000 Ethernet
PMS Connection	10/100/1000 Ethernet or RS232
	1 1152

Network Requirements		
SmartCube Communication		SmartCube Server on Static IP Address on Dedicated SmartCube VLAN
PMS comm	nunication	SmartCube Server on a Static IP that is routed to the PMS Interface
Port		Purpose
10001	UDP	SmartCube bidirectional communication
12345	ТСР	Handheld Unit (HTTPS)
54321	ТСР	Handheld Unit (HTTPS)
443	ТСР	SmartCube Attendant PC
67	UDP	DHCP
68	UDP	DHCP
		ALL 2 442

Interface

	WiFi Specifications
Standard	802.11 b,g,n 2.4Ghz
Encryption	WPA / WPA2-PSK
SSID	Hidden SSID with Password
Signal	-65dBm or better at the SmartCube location
	Tablet Specifications
Operating System	Android Version 7.1 (Nougat) or Later
Communication	Bluetooth & WiFi
Memory	16 GB
	Tablet Communications
Bluetooth 🖇	Used to connect tablet to SmartCube to perform refills
Wifi 🎅	Used to sync refills from server to tablet
SmartCub	e Client/Workstation Specifications
Processor	2.4 GHz or faster (x86 or x64)
Memory	2GB Dedicated RAM
Ethernet	10/100 Fast Ethernet
Operating System	Windows 10 or higher
Browser	Chrome
